

Client:
Impact Networking

Location:
Madison, WI

Project Type:
Corporate Office and
Showroom Remodel

Impact Networking (formerly Kubicheck)

Requirements:

As a cutting edge technology company, Kubicheck was looking for an updated image for its Madison location. While aesthetics were a priority, maximizing the space and staying within budget were equally important.

Recommendations:

The Schroeder Solutions' design team took cues from the brand of both the Chicago and Brookfield offices to create a new, innovative work environment for the Kubicheck Madison team. Working under a tight timeframe, the design team created an open space plan utilizing the 120-degree planning capabilities of Teknion ie. This system allowed the design team to maximize the space in order to accommodate a greater number of employees while not sacrificing function. In addition, a contemporary finish palette inspired by the Kubicheck corporate colors was selected. This palette includes light wood tones, chrome and silver metal finishes and colorful accents of vibrant red. Teknion's top-selling ergonomic Contessa chair and stylish contemporary furnishings such as the Nami stool add to the overall impact of the design while providing maximum comfort and efficiency.

Product Showcase:

- Space planning and finish and furniture Selection
- Teknion: ie workstations, Contessa and Nami seating
- Furniture installation and reconfiguration

Results:

"Impact Networking's experience with Schroeder Solutions has been very positive. Both the customer service and quality of our office furniture has met our requirements and specifications throughout both the pre and post sales process." – Nicholas J. Roberts, Branch Manager
