

Client:
Cobalt Corporation

Location:
Milwaukee, WI

Project Type:
Architectural Products –
Movable Wall System

COBALT CORPORATION

REQUIREMENTS

Cobalt's main objective was to separate the department that handled the government services from the department of public services. Also, there had to be a flexible solution to drywall because the departments' size and location change so frequently. The project was to be completed in two phases, on the fifth and seventh floors.

RECOMMENDATIONS

In conjunction with the General Contractor, Full Circle, Cobalt hired Schroeder Solutions to complete the project. On the seventh floor 102 lineal feet of Trendwall was installed to separate the government service department from the public service department. We incorporated their existing Trendwall area together with the new area to create a conference room and additional office area. On the fifth floor we dismantled 60 lineal feet of existing Trendwall, reconfigured the area and added product to facilitate the expansion of government services. The existing Trendwall panel skins were updated one at a time by pulling them out, recovering them and putting them back into place. All this work was performed without disturbing the adjacent office areas, making sure to keep them secure during the project. On a daily basis we continue to install, reconfigure and relocate their office furniture at multiple locations throughout Wisconsin, Minnesota and Michigan.

PRODUCT/SERVICE SHOWCASE

- Trendwall
- Installation and Move Coordination
- Project Management
- Furniture Reconfiguration

RESULTS

"We continue to appreciate the value of the Trendwall Movable Wall system because it helps us support change in our work environment. With this wall system and Schroeder Solutions personnel we are able to facilitate quick change for our customers on a regular basis."
