

# INTERNATIONAL TRUCK

## REQUIREMENTS

The leadership at International Truck know that first impressions last. Therefore they knew it was time to enhance the office environment at their Waukesha location. With offices across the country, International Truck was seeking the efficiencies that come with effective space planning as well as the enhanced visual appearance to complement their satellite locations.

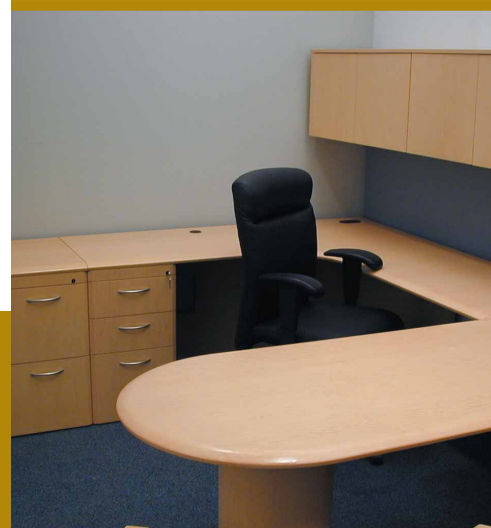

## RECOMMENDATIONS

The Integrated Office Solutions team developed a space plan and an interior design that would utilize International Truck's existing furniture inventory as well as the addition of new, complementary, pieces. New floor coverings were recommended that would withstand traffic volume and add a sense of style to the offices. The space was designed to create a more efficient work space for over 75 employees.

Time is money. Especially when you're moving large numbers of employees. Schroeder Installation's project managers were able to minimize the downtime for employees of International Truck. They brought the interior design to life on-time and on-budget.

## PROJECT SHOWCASE

Space Planning Service  
Interior Design Services  
Inventory and Refurbishing Systems Furniture  
Milliken Modular Flooring  
Project Management Services  
Installation Services

## RESULTS

"There were many people from Integrated Office Solutions and Schroeder Installation Systems who deserve a note of thanks for their patience and eagerness to accommodate our wants and needs."
